

**ACCUTRAK**<sup>®</sup>  
ELECTRIC TRACKSIDE APPLICATORS

**High tech.  
Low maintenance.**

# Temperatures vary. Our output doesn't.

## ELECTRIC TRACKSIDE APPLICATORS

Whitmore has a long history of innovation. Whitmore Rail AccuTrack® Electric Trackside Applicators provide technological advancements mechanical and hydraulic applicators can't offer. In fact, one AccuTrack unit can typically replace several older non-electrical applicators, saving you time and money.

AccuTrack electric applicators can be powered by a combination of sources. Flexibility like this allows you to choose the system that suits every environment. Standard system pumping distance is typically up to 50 feet. These units have a robust waterproof cabinet with a convenient filling hatch.

- **CONSISTENT OUTPUT IN ALL TEMPERATURES**
- **MULTIPLE TANK SIZES AVAILABLE WITH A FLOODED SUCTION INLET**
- **SINGLE OR DUAL TRACK APPLICATORS**
- **EASY MAINTENANCE**
- **FITS ALL RAIL TYPES**
- **REMOTE MONITORING CAPABILITIES**
- **POWERED BY BATTERY, SOLAR, WIND, A/C OR A COMBINATION OF SOURCES**
- **MADE IN USA**
