

**Lubrication problems?
Meet the solution.
SurStik® 800.**

SurStik® 800. Multiservice open gear lubricant.

EXTREME PRESSURE OPEN GEAR LUBRICANT

SurStik800 is a high performance extreme pressure lubricant designed for use on open gears and other highly loaded components under the most punishing conditions and hostile environments.

The dark lubricating film formed by SurStik 800 is robust and tenacious. It is easily established and highly resistant to being washed off by over-lubrication. The use of high molecular weight polymers assures adhesion of solid lubricants to the component and long lubrication intervals. SurStik 800 will not be removed from shovel dipper sticks by wet or freezing conditions.

SurStik 800 meets the P&H Material Specification #520 for multiservice lubricants.

- **TCLP-SAFE** - passes the EPA Toxicity Characteristic Leaching Procedure. This means that the product is free of heavy metals and ozone-depleting solvents.
- **WEAR PROTECTION** - extends component life, reduces operating expenses.
- **MULTISERVICE LUBRICANT** - for use on draglines and shovels.
- **PUMPABILITY** - In many climates, a single grade can be used year-round. SurStik 800 does not damage seals or packing materials used in pumping systems and injectors.
