

Wire Rope Lubricants

Drag Rope Lubricant Contains extreme pressure and anti-wear additives that are combined with rust and corrosion inhibitors to extend rope life and protect it when drawn through abrasive soil and rock.

Wire Rope Lubricant Produces a nondrying, non-tacky film on outer rope strands, while quickly penetrating to the rope core.

WR-5 Penetrates then the solvent evaporates, leaving a high viscosity film that contains anti-wear additives.

	DRAG ROPE LUBRICANT	WIRE ROPE LUBRICANT	WR-5
Type	Asphalt with Solvent	Penetrating Anti-Wear	High Viscosity Oil with Solvent for Penetration
Applications	Dragline drag ropes and all wire ropes that tend to wear from the outside	Hoist ropes on draglines and shovels and all wire ropes that tend to wear from the inside	All wire ropes
Comments	Solvent evaporates leaving a dense protective film to protect the outer strands.	Very low surface tension promotes deep penetration, protecting inner strands.	Penetrates, then solvent evaporates, increasing viscosity.
Base Oil Viscosity (before addition of solvent)	783,000 cSt @ 40°C	22 cSt @ 40°C	2,500 cSt @ 40°C
Viscosity of Finished Product	1,381 cSt @ 40°C	22 cSt @ 40°C (contains no solvent)	80 cSt @ 40°C

WHITMORE'S®
THE WHITMORE GROUP

The Whitmore Group, consisting of The Whitmore Manufacturing Company, KATS Coatings, Horizon Lubricants, and Fluid Protection Corporation, is a leader in creating component protection technology through the manufacturing of specialized lubricants, coatings, sealants, and contamination control breathers with broad product application for a variety of industries.

Since our beginning in 1893, relationships with customers, OEMs and our Distributor partners have helped maintain our reputation for quality products, dependable service, and an attention to customer satisfaction. Whitmore's family of quality products and services are sold around the world through a service-intensive distribution

network committed to technical support and total customer satisfaction. Customers in a variety of industries choose Whitmore products for two simple reasons: the products are designed and manufactured to high quality standards, and they are available at a fair market value.

Whitmore's Rockwall, Texas facility includes a fully integrated manufacturing plant, state-of-the-art research center, training facility, and corporate offices. Well-trained and competent employee-owners work at every level of the operation.
