

MEDALLION™ WHITE ANTI-SEIZE
ASSEMBLY PASTE
NSF Registered for H-1

Medallion™ White Anti-Seize is a premium quality assembly paste that provides excellent protection from seizure, galling, rust and corrosion.

Medallion™ White Anti-Seize protects metal surfaces from wear due to vibrations that can occur under static contact conditions. Seizure can occur in these tight-fitting applications.

The aluminum complex thickener used in Medallion™ White Anti-Seize Lubricant makes it highly water resistant.

Medallion™ White Anti-Seize is not categorized as a grease. It can be used on bushings, but should not be used in anti-friction (roller) bearings.

BENEFITS:

- H-1 RATED - for use in federally inspected meat and poultry plants, as well as beverage and other food processing facilities where incidental food contact may occur.
WATER-RESISTANT - stays in place.
REDUCES WEAR - extends application life.
RESISTS POUNDOUT - provides extra protection and reduces consumption.

APPLICATIONS:

Medallion™ White Anti-Seize may be used in any tight-fitting static application such as pipe fittings and bolts, and is particularly useful where corrosion and seizure have occurred in the past.

Medallion™ White Anti-Seize can also be used as an antirust film and as a release agent for gaskets.

Table with 3 columns: ASTM #, Description, and TYPICAL CHARACTERISTICS. Rows include NSF Registration (H-1), Grade (1.5), D-217 Cone Penetration (270-310), D-2265 Dropping Point (>450), Gardner Method Density and Specific Gravity (9.20, 1.104), D-2596 Four Ball EP Weld Point (620), D-1743 Rust Test (Pass), D-4048 Copper Strip Corrosion (1A), Thickener Type (Aluminum Complex), Appearance (Off-White Paste), B-117 Salt Fog Resistance (>200), and Operating Range (-65 to 1,800).

The above are average values. Minor variations which do not affect product performance are to be expected in normal manufacturing.

PACKAGING

Table with 2 columns: Brush Top Cans. Row 1: 12 - 1/2 lb cans. Row 2: 12 - 1 lb cans.
