

YOU ASKED, WE ANSWERED. MEMOLUB™ DUAL.

Whitmore Rail is proud to introduce MemoLub Dual, an enhanced design configuration for its existing MemoLub Canisters. Maintenance crews safety and time is critical. The design places the canisters away from the rail and into an off track cabinet with an additional grease canister, doubling the intervals between refill visits while protecting them from the environment. With MemoLub Dual, track time is reduced to enhance crew safety, reduce maintenance time and cost.

FEATURES AND BENEFITS

- ***Greater grease capacity***
- ***Less frequent fill intervals***
- ***Safe and easy filing***
- ***Low Maintenance***
- ***Off track housing with extra cartridge storage***
- ***Low cost of ownership***
- ***Utilizes existing proven and approved components***

DUAL CANISTER-BASED LUBRICATION SYSTEM

MemoLub Dual is a cost effective, easy-to-use, canister-based lubrication system - suitable for use on running rails, check rails and point ends. These electro-mechanical systems deliver precise amounts of grease up to 20 metres from the canister to the blade. The safe and secure enclosure provides peace of mind. Track time is reduced by 4', saving you time and money.

MemoLub

APPLICATIONS:

- **Check Rail**
- **Gauge-face with low traffic volumes**
- **S&C**
- **Top-of-rail with S&C**
