## **Whitmore's® Latest Turn-key Solution: Satellite Lubrication Room**

*Highly Portable Structures Take OilSafe® Performance to New Heights*

Rockwall, Texas, April 24, 2017 – Whitmore, a CSW Industrials Company and leading innovator of products and services which increase the reliability, productivity, and lifespan of industrial assets, proudly brings to market the Satellite Lube Room, a full-featured “go anywhere” storage solution.

“OilSafe has always been about streamlining storage and handling of lubricants in a way that is simple, clean, and efficient. But the demanding environments of many industrial sites can wreak havoc on equipment and lubricants if it isn’t housed well. Instead of forcing operators to bring the machine to the lube station, this product brings a lube room closer to the machine,” said Steve Anderson, Product Development Director at Whitmore.

The Satellite Lube Room supports all the essential features of an OilSafe lubrication setup and packages them into a fully self-contained, regulation compliant structure that can be loaded (in its 20 ft. configuration) onto a flatbed tow truck and moved easily with a forklift (both 20 ft. and 40 ft. models).

Doug Reid, VP of Product Development describes the new lube rooms as, “A serious operational upgrade for clients struggling to find a lubrication storage option that is both robust and flexible enough to take into the field on a permanent basis.”

### **About Whitmore**

Established in 1893, Whitmore is a global leader in providing innovative products and services that increase the reliability, performance and lifespan of industrial assets. We manufacture reliability products, high-performance lubricants, friction modifiers, application and inspection equipment, lubrication management systems and cleaners designed to meet the specific needs of each industry and application. Industrial customers worldwide rely on Whitmore to deliver the performance engineered solutions industry counts on even in the most adverse conditions and demanding environments.
